WASTEWATER TREATMENT AND REUSE

MINE
HydroBioX treatment
Reuse for industrial purposes

FOOD INDUSTRIES
HydroBioX treatment
Reuse to clean the materials

REST AREA
HydroBioX treatment
Reuse for a car wash

HOUSING PROJECT
HydroBioX treatment
Reuse for agriculture

ACCOMODATIONS
HydroBioX treatment
Reuse for toilets

HYDRBIOX®

New wastewater treatment system **optimized for unserviced residences or residential projects.**

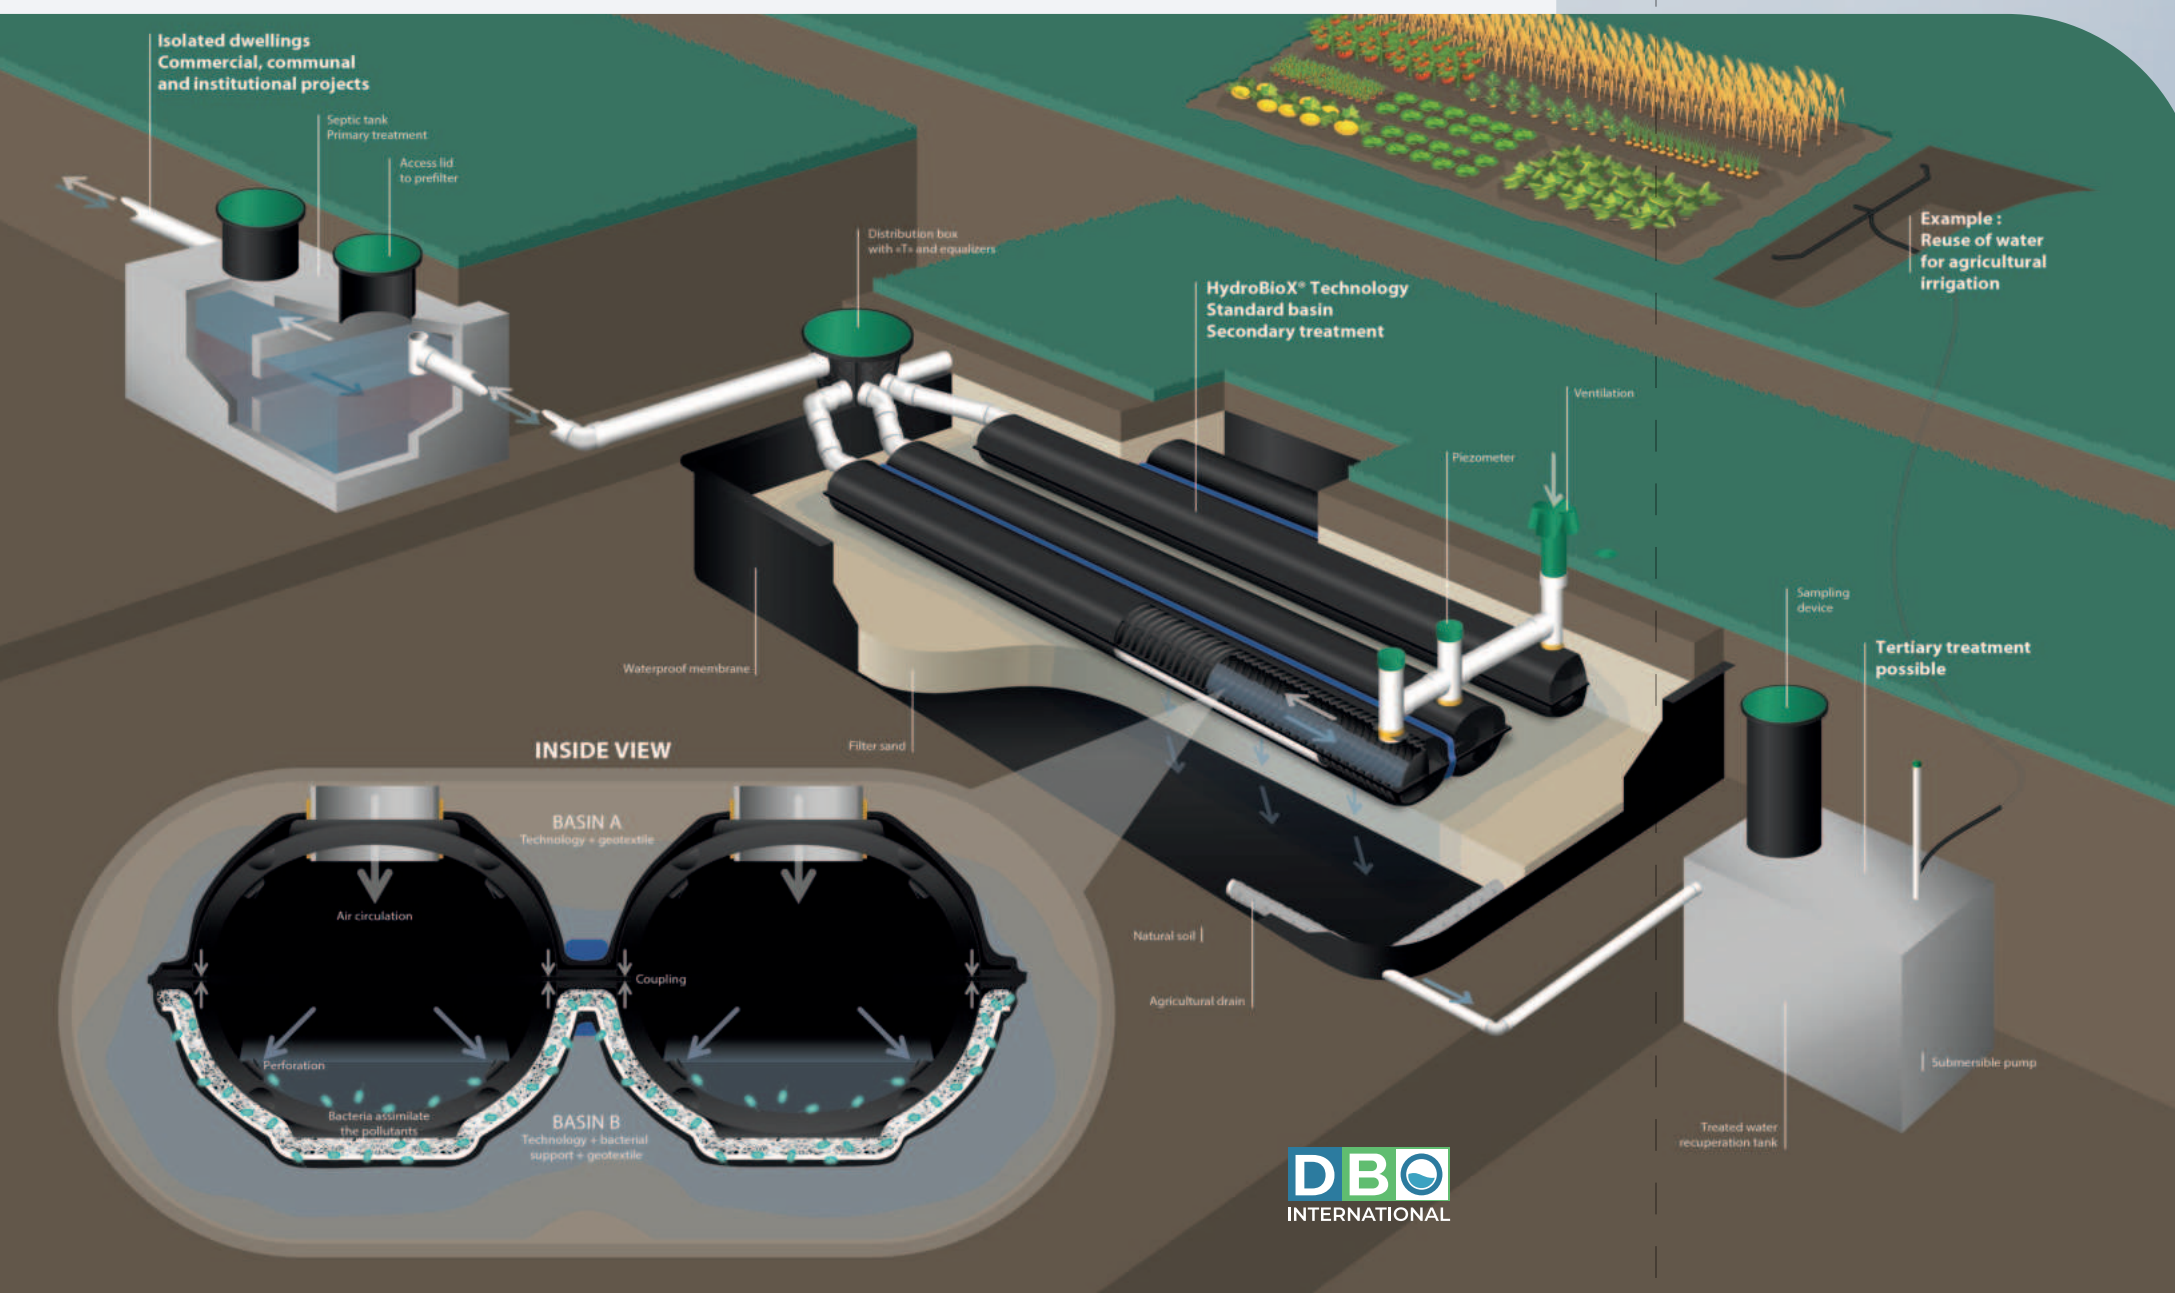

Very affordable, passive and compact!

- A Canadian innovation, **100% organic and autonomous** : without electricity, mechanic and maintenance.
- Possibility to **reuse** treated water for agriculture, toilet flushing, car wash, industrial use and more, **to save water**.
- Possibility of **tertiary treatment** including disinfection, dephosphatation and denitrification.
- Simple, easy to install with a **small footprint**.
- **A 30% reduction in GHG production** compared to already existing technologies.

« The art of treating and reusing wastewater in an environmentally safe way using a powerful and economical biological ecosystem.

HydroBioX is a forerunner in meeting Sustainable Development Goal 6 (of the United Nations) which aims to improve water quality, wastewater treatment and safe reuse by 2030. »

Benoît Boucher - President

DBO
INTERNATIONAL

Time is running!
let's maximize **the recovery of treated water for a proper reuse.**

A simple solution to the **hydric stress that disrupts our biodiversity.**
